

TEST STRIPS MOVEABLE BY MAGNETIC FIELDS

ABSTRACT

5 Test strips, kits containing the tests strips, and methods for making,
moving, sorting, storing, immobilizing, or otherwise handling test strips are
disclosed herein. The test strips are used in material analyses and include a
magnetically attractive material disposed upon or within the test strips in such an
amount and at such a location that the test strips will move or will adopt a desired
spatial orientation or will align in response to a magnetic field.
